

K-LOVE radio uses translator stations to broadcast. We listen so we don't have to listen to depressing, sexually suggestive, or lewd lyrics. Yes, we could listen to KGBI, but K-LOVE is music supported by listeners with no talk programming.

Children and adults that listen would be deprived of healthy listening and a positive, family oriented programming 24/7.

In Omaha we are trying to bring back wholesomeness and a family united rather than worldly, disruptive, family dividing programming. We need K-LOVE. It provides the community with radio programming that is a decent, positive, and healthy alternative to the vile programming we would have to listen to otherwise.
